mand-Proposition to Equip Hospitals and Homes.

The following cablegram has been re ceived at the headquarters of the Red ross in Washington from the representatives of the Red Cross in Cuba:

Chief surgeon at Clentuegos reports 600 or-phases, from four to Iwelve years, d-stitute and builty cared for. Send sufficient bedding, sheets, clothing, aprons, shoes, stockings, and other sup-nites. Make shipment direct to Cientuegos by Ward Line. We will be ready to receive and ad-minister. Send six muses to Clentuegos, six Ma-tanzas, six Hayana.

At Cienfuegos it is proposed to estab-lish and equip the necessary buildings for hospitals and homes for the orphan chil-dren there. At Guines the Red Cross work is in progress, but it was found necessary, before any of the buildings could be used, to remove the patients, and have them thoroughly cleansed and disinfected. A number of tents being required, application was made to General Brooke by Dr. Kent, who reports as follows: who reports as follows:

After Dr. Hubbell left far Guines yesterday I called on General Brooke to ask for an order for tents and cots. The general sent for me as soon as my name was sent in, although it was soon as my name was sent in, although it was soon as my name was sent in, although it was soon as my name was sent in, although it was soon as my name was sent in, although it was followed by the tents and eots, he requested me to make formal application, which I did; he approved it at once, rang the bell, and gave orders to have the things shipped at once. I thanked him heartily for this promptness and courtesy, and he reglied that we must work together if we are to accomplish anything.

We also went out to visit General Lee's head-leats, cots, mattresses, lineus, lumber, etc., which the amy is leaving behind. The general received a most cordially, and expressed a desire to aid the work in every possible way, and we may private be able to secure much materials, which will be of great assistance in the hospital work.

CORRIGAN'S VISIT TO THE PRESIDENT

Catholic Church Property in the Philippines.

The Archbishop's Suggestion This Government.

trol-Bourke Cockran as an Envoy to the Vatienn.

Archbishop Corrigan, of New York, saw President McKinley and officers of the War Department yesterday for the purpose of discussing the question of the status and disposition of the property of the Catholic Church in the Philippine Islands.

It is said that Archbishop Corrigan made an application to the Government to have all the church property in the archipelago turned over to the jurisdiction of the American hierarchy.

Archbishop Corrigan came to Washington Thursday night accompanied by former Postmaster General James and J. A. L. Warner, of New York. These gentlemen were entertained yesterday at funcheon by Postmaster General Smith, after which they made their visits to the President and the War Department.

The definite result of the conferences between Archbishop Corrigan, the President, ween Archbishop Corrigan, the President, and the War Department officials is not known, but it was stated on good authority that in all probability Bourke Cockran will be sent to Rome to explain at the Vatican the legal aspect of the conditions.

The status of the Catholic Church in the Philippine Islands is different from that of the church in Cuba. In the former case the church property passed to the United States with all other property on the islands.

It is claimed, however, that there can be part of the United States domain. The natural government and control of church property in the Philippine Archipelago would be exerted by church authorities in this country, and not by an ecclesiastical body which formed part of the church es-tablishment of Spain.

It is understood that the Archbishop of Manila approves of the plan of a submis-

Mantla approves of the plan of a submis-sion of his pastoral jurisdiction to the disposition of the Vatican and of Cardinal Gibbons, and other archbishops of this country, and that there will be no difficulty in the way of the President agreeing to the proposition of Archbishop Corrigan.

This proposition will be submitted to the Philippine Commission and to General Otis as military governor of the islands. It is deemed not unusual that a matter of this kind should have been brought to the attention of the President by Archbishop Corrigan rather than by Archbishop Martinelli, the Papal legate in the United tinelli, the Papal legate in the United States. There are no diplomatic relations between Archbishop Martinelli and the State Department, and besides the ques-tion concerns ecclestastical authorities in the United States and its possessions. It is altogether probable, however, that Archbishop Corrigan's activity in the mat ter is due to the desire of the Catholic Church authorities that there should be an

early and amicable settlement of the church property question in the Philip-Archbishop Corrigan, Mr. James, and Mr.

New York in Holiday Garb to Re-

ceive the Manila Fighters. New York, April 15.-The city has been gaily decorated in honor of Raleigh Day. Government buildings, business houses and private residences are flying Old Glory and altogether the city has taken on a

holiday appearance. Up to 12 o'clock the Raleigh had not been sighted, but watchers are stationed

along the Jersey Coast as far as Atlantic City, and her appearance will be quickly flashed to New York. Then Mayor Van Wyck and a host of dignitaries will go down the bay to meet dignitaries will go down the bay to meet and welcome the cruiser. Much powder will be burned in firing salutes, the mayor and the committee will formally welcome Captain Coghlan and his brave crew, and then a grand naval parade will be held. With the Raleigh in the centre, the fleet will steam to Grant's tomb and then back. Thousands of persons will line the ahores and the progress of the cruiser will be one grand ovation. Later the jackies on the cruiser will be given shore leave, and will be given the best of everything in town. The officers will also be the recipients of a warm home welcome.

The officers will also be the recipients of a warm home welcome.

Mrs. Coghlan, wife of the gallant commander of the Raieigh, went down the bay early this morning in a tug. She will be the first to welcome her husband. A number of Dewey's relatives from Vermont are in town and will participate in the welcome. Governor Roosevelt has accepted an invitation to take part in the reception.

sident of the United Mine Workers of America, was continued at this

stated that there had been but one atas being ineffective on account of the difsculty experienced in attacking the entire supply. He regarded the boycott as a severe measure, and thought that it ough o be employed only after every reasonable means has failed. If the boycott could be made to come within the bounds of the law he expressed the belief that it ought to be used. In reference to blacklisting,

to be used. In reference to blacklisting, he had heard of instances where men had oeen blacklisted for their "unionism." This is particularly true in West Virginia. In times of strikes picketing and patroling of mine property is practiced. The witness said that it was regarded by the organization as being legitimate, and is employed as one of the means for effectively cutting off the coal supply. Reason and persuasion, in all instances, is used by the striking miners to induce those who are at first indisposed to stop work, and it is seldom that violence takes the place of this method. There is nothing in the constitution of the organization which relates to the matter of patroling and picketing. The advisability of employing this method is left to the discretion of the local organization.

In 1897 when miners were brought from Birmingham, Ala., to Springfield, Ill., for the purpose of taking the place of the striking union men, the Illinois branch of the association hired a hall, took the new men there, reasoned with them, fed them for several days, and finally chartered a train and sent back to Birmingham all who were willing to go. No violence or threats were used in urging these men to go.

Mr. Davis was opposed to the importa-

Mr. Davis was opposed to the importa-tion of contract labor from one State to another. He thought that the citizens of one State should be protected from this character of labor from another State as

much as they are protected from contract labor from a foreign nation.

In speaking of conciliation he said that this method is generally accepted by the miners. He expressed himself in favor, in but not in all cases. The miners do re-gard its practice as for the best interests of both parties.

The witness thought the injunction as

The witness thought the injunction as generally used in the cases of strikes is not right. The miners are in favor of having weekly pay. The advantage of this to the workman, Mr. Davis stated, is that he is enabled to buy goods cheaper at cash prices than under the present semimonthly system of payment which compels him to run an account.

"Considerable friction exists at the present time," said the witness, "by the system of fluing now in vogue." He condemned the tenement system imposed by owners upon their workmen and protested against the exorbitant rents collected for the use of these. The best houses of this nature are found in the anthracite region of Pennsylvania. In West Virginia the houses are exceedingly unsubstantial, no of Pennsylvania. In West Virginia the houses are exceedingly unsubstantial, no attention is paid to water supply and no sanitary conveniences are provided. Large rents are charged for these dwellings. From \$2 to \$8 a week is the usual rent. "The homes of the miners," the witness stated, "are far inferior to those of other classes of laborers. Owing to the efforts of the miners' organization the wages of miners from 1868 to 1854 were considerably miners from 1869 to 1894 were considerably higher than in the preceding Since 1894 the wage scale has le The Miners Association has since its or-ganization in 1896 been compelled to wage

a continual fight to maintain the higher The witness stated that children are no employed in the mines as generally as in previous years. The witness went to work when he was nine years old. He thought eighteen years should be the age limit. The reason why children are employed in the mines is that the father is unable to earn enough money to support his family and is compelled to seek employment for them in the mines. Mr. Davis objected to convict labor be-

ing employed in the mining industry. The operator employing convict labor can produce his coal very much more cheaply than the owner who must employ free

THE ARMY IN CUBA. secretary Alger's Plans Regarding

Secretary Alger said this morning that he expects to take up the question of reorganizing the military departments in Cuba early next week. He will probably only make such changes as experience has

shown to be advisable.

Perhaps there will hereafter be only three departments in the island outside of the city of Havana. General Brooke is likely to remain all summer in command of the entire division with Generals Lee, Wil-son, and Wood as Department commanders. No change is contemplated in General Ludlow's command at Hayana.

ANTICS OF A BULL CALF. Invades a Cafe and Jumps Through

a Window. Kingston, N. Y., April 15.—An infuriated ull calf escaped in North Front Stree resterday and dashed into Cohen Brothers saloon. After running wildly about for a few moments, knocking tables, chairs, and everything topsy turvy and badly scaring the occupants, the calf leaped through big plateglass window in the rear to the yard below, a distance of 30 feet. Strange to say, he was unburt, having landed on

an old bedspring on which some boards had been loosely thrown.

"A!" Avery, a young lad, was so badly frightened when the calf bolted into the saloon that he fled into an adjoining room and locked the door. Several leaped on the pool table, while others hid behind the har. The calf was crazed by seeing blood on the apron of P. A. Lasher, a butcher, who had bought him from a farmer. Cohens' saloon, being built on a bluff, the rear yard is considerably lower than the entrance.
